Amazing skin renewal

The makers of Merlot Moonlight Radiance [Night Cream](#) say its active ingredient, grapeseed extract, is 25 times more powerful than vitamin C and 50 times more powerful than vitamin E when it comes to protecting skin from free radicals. We don't know about that, but we do know that our testers stood in line to try this line. And they loved it. The Night Cream is lightweight but super-hydrating and improves the way skin looks and feels. There are 13 other products in this line, including an eye cream, a body-firming lotion, a hand cream and pure grapeseed oil to help heal scars. Find out more at [MerlotSkinCare.com](#).
